COMPONENT SCREENING SOLUTIONS THAT WORK FOR YOUR BUSINESS.

SemiDice provides value to our customer base not only in the die industry, but by using our core capabilities to inspect and screen packaged products. If you use commercial or industrial rated product and require screening over higher temperatures we can help. Visual inspection and Tape & Reel services are also available. We can also return the product inspected and in tape and reel. Also, as a small yet flexible business, SemiDice offers one-off screening at more competitive pricing with a quick turnaround. Whether your requirements are for generic devices or product tested and supplied to your source control drawings, SemiDice can react quickly to provide solutions. Our facility is staffed with fully trained sales and technical personnel capable of supplying up-to-date information on product availability, component selection and product screening requirements. The corporate facility is equipped with ESD protected clean rooms, nitrogen stored inventory and complete technical libraries.
